Subject: environmental labelling of packaging

Dear CUSTOMER,

ISO.STAMP S.r.l. considers compliance with applicable regulations to be a fundamental element of its corporate management. For this reason, we constantly monitor legislative developments concerning packaging and require our suppliers to provide the documentation necessary to verify the compliance of the materials and packaging used.

The applicable regulatory framework includes, in particular:

- **Article 219 of Italian Legislative Decree No. 152 of 3 April 2006**, as amended by Legislative Decree No. 116 of 3 September 2020 (transposing EU Directives 2018/851 on waste and 2018/852 on packaging and packaging waste), as well as **Decree No. 360 of the Italian Ministry for Ecological Transition of 28 September 2022**, adopting the Technical Guidelines on packaging environmental labelling.
- **Commission Decision 97/129/EC**, which establishes the identification system for packaging materials and remains temporarily in force at national level until 12 August 2028, pending the future harmonisation of European pictograms.
- **Regulation (EU) 2025/40 (PPWR)**, applicable from 12 August 2026, which progressively introduces new harmonised requirements concerning packaging sustainability, compliance and labelling.

According to the applicable Italian provisions and the related national guidelines, packaging intended for the **B2B market** shall be identified by the **alphanumeric material coding system** for packaging materials. The required environmental information may also be made available through **digital channels** or commercial documentation accompanying the goods.

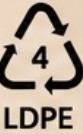

In order to facilitate the identification of packaging materials and their proper management at end of life, **ISO.STAMP S.r.l. provides information** on the composition of its packaging and the corresponding disposal instructions in the **document attached to this communication**.

Should you require any further information, please do not hesitate to contact us.

Kind Regards
