Subject: Regulation (EU) 2025/40 on packaging and packaging waste (PPWR)

ISO.STAMP – Isolanti Stampati S.r.l. has made a reasonable review of the manufacturing components, processes, and supporting documentation and states that to the best of its knowledge, the packaging used for the products we supply to you comply with the Regulations listed below.

Regulation (EC) No. 1907/2006: list of Candidate Substances of Very High Concern (SVHC) and Restricted Substances List (Annex XVII)

ISO.STAMP declares that it operates in compliance with the applicable provisions of Regulation (EC) No 1907/2006 (REACH), based on the information available and received from its suppliers concerning the products placed on the market.

ISO.STAMP does not manufacture chemical substances (either as such or as components of mixtures), but manufactures and markets products that qualify as Articles pursuant to Article 3(3) of the REACH Regulation. ISO.STAMP maintains an ongoing process for collecting and updating information concerning the compliance of the raw materials and components used, requesting from its suppliers the information necessary to verify the applicable obligations throughout the supply chain.

Pursuant to Article 33 of the REACH Regulation, suppliers of Articles containing substances included in the **Candidate List of Substances of Very High Concern (SVHC)** at a concentration above **0.1% weight by weight (w/w)** are required to inform the recipient of the presence of such substances. In the case of complex objects, this threshold applies to each individual component Article.

Based on the information received from our suppliers and available as of the date of this declaration, the packaging used for the items manufactured and marketed by ISO.STAMP:

- Do not contain substances classified as **SVHCs** at concentrations above 0.1% weight by weight (w/w).
- Comply with the applicable restrictions set out in **Annex XVII** of the REACH Regulation, taking into account the conditions, concentration limits and uses specified in the individual entries of the Annex.

List of SVHC's: <https://echa.europa.eu/it/candidate-list-table>

Restricted Substances List: <https://echa.europa.eu/it/substances-restricted-under-reach>

Regulation (EU) 2025/40: packaging and packaging waste (PPWR)

Based on the information received from our suppliers and available as of the date of this declaration, the packaging used for the items manufactured and marketed by ISO.STAMP COMPLY with all the sustainability requirements set out in the EU Regulation on Packaging and Packaging Waste (PPWR), where applicable.

In particular, compliance with Articles 5 to 12 of the aforementioned Regulation is confirmed, concerning:

Art. 5 – Chemical substances and safety

The packaging DOES NOT CONTAIN prohibited substances or substances subject to restrictions beyond the permitted limits. The sum of the concentrations of lead, cadmium, mercury and hexavalent chromium resulting from substances present in packaging or packaging components shall not exceed 100 mg/kg.

Art. 6 – Recyclability and circular design

The packaging is designed to be recyclable according to applicable EU criteria.

Art. 7 – Minimum recycled content in plastic packaging

The packaging complies with the minimum recycled content requirements established by the Regulation.

Art. 10 – Reduction and optimization

The weight and volume of the packaging have been optimized to minimize material usage.

There are no superfluous or unnecessary packaging elements.

Art. 12 – Labeling

According to the applicable Italian provisions and the related national guidelines, packaging intended for the B2B market shall be identified by the alphanumeric material coding system for packaging materials. The required environmental information may also be made available through digital channels or commercial documentation accompanying the goods.

In order to facilitate the identification of packaging materials and their proper management at end of life, ISO.STAMP S.r.l. provides information on the composition of its packaging and the corresponding instructions for collection and disposal, available in the document that can be downloaded from the dedicated section of the company website.

This declaration will be updated in the event of regulatory changes or if new information relevant to product compliance becomes available.

Best Regards

ISO.STAMP – Isolanti Stampati S.r.l.
